# 1. Who we are

A one-stop service for construction architectural design

We are a one-stop service for construction architectural design, headquartered in Sapporo in Hokkaido, Japan.

We have overseas operations in Dailan in **China**, and Yangon in **Myanmar**.

Who we are k式会社 一寸房

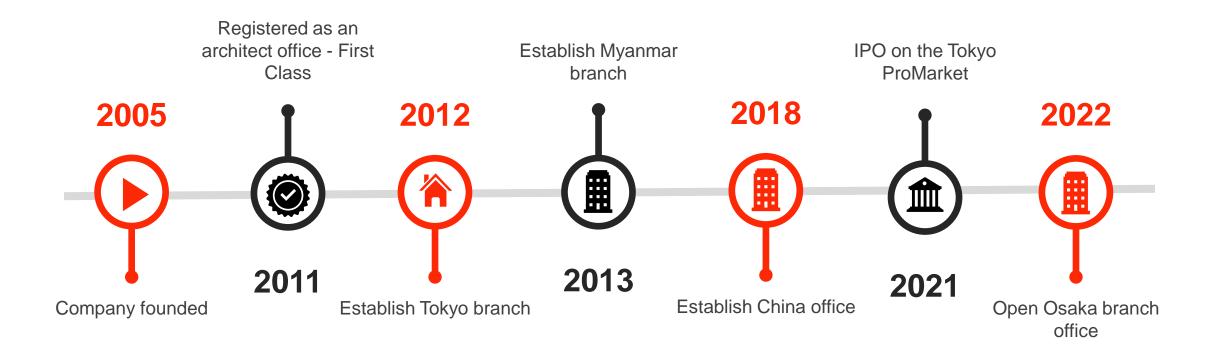

Our customers include general contractors, house builders, construction consultancies, trading companies and fabricators.

We aim to provide solutions to customer needs with our **200-strong workforce**.

### Our history

# 2. What we do

Brief introduction to our business segments

### Our services

Complying with the latest laws and regulations, meeting customer needs and functionality requirements.

Designing the structural framework of buildings considering the size of columns and beams.

**Construction Design** 

Creating steel frame designs based on blueprints.

Computer graphic rendering of buildings and landscapes.

Surveying services to measure position, distance and area.

**BIM/CIM\*** 

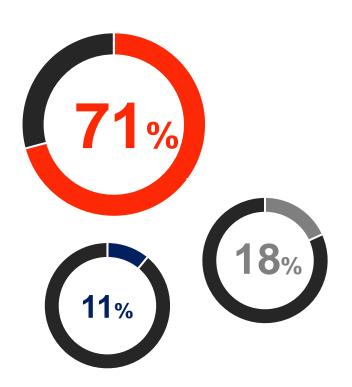

3D modelling for surveying, design and construction, sharing information with all parties involved and improving efficiency.

### Our business segments

# Sales Split Per Segment

We have three business lines, with Design Solutions being the core activity making up 71% of FY7/2021 total sales.

#### **71% Design Solution**

Incorporates architectural and structural design, as well as steel frame design, 3D design (BIM/CIM) and VR. A one-stop solution for all your construction design needs.

#### 18% Surveying

Primarily survey work conducted for national government and public sector.

#### 11% Dispatching

We dispatch our employees who have structural and construction design expertise to general contractors and major house builders.

# 3. Facts and figures

Our key financials from our latest results

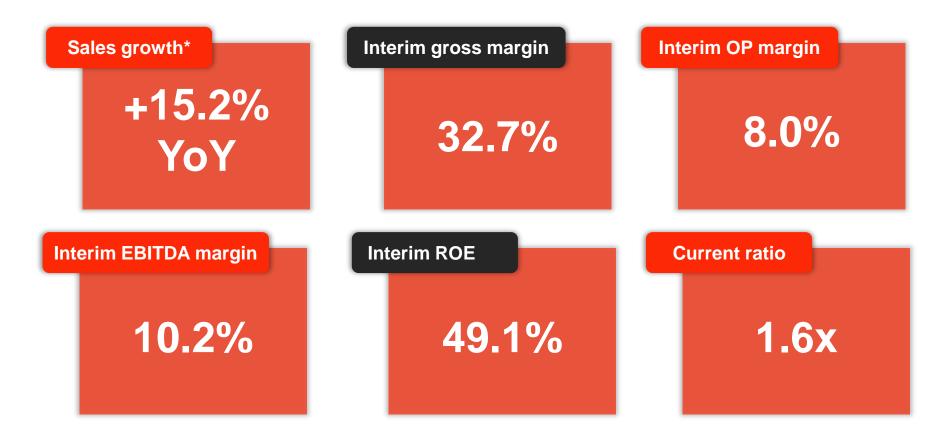

### Facts and figures

#### From H1 FY7/2022 results

# 4. Our competitive edge

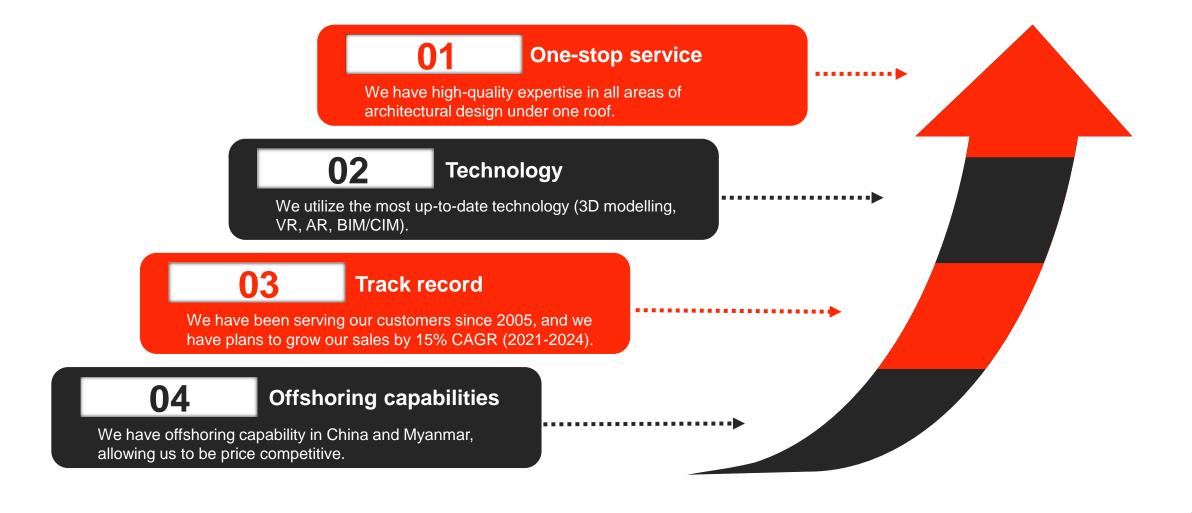

What makes us stand out from the crowd

# Our competitive edge

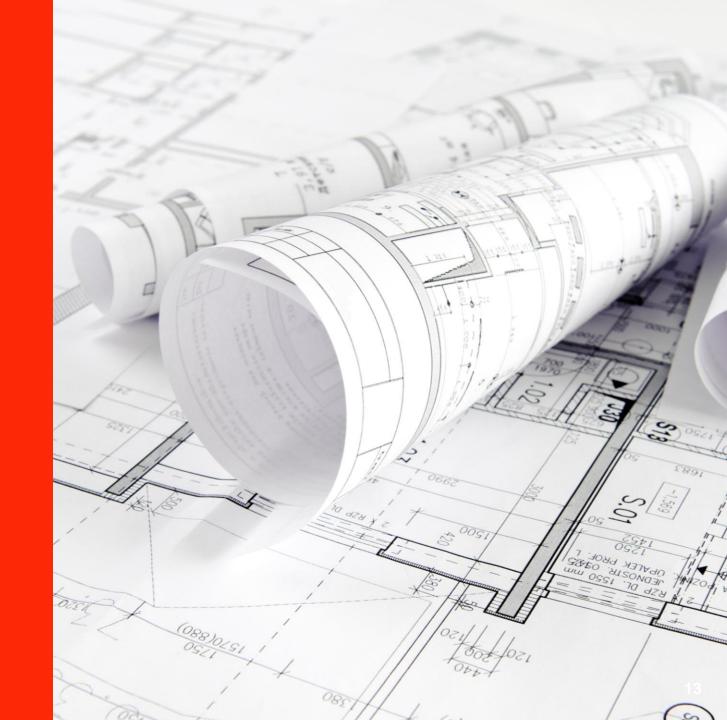

### **Customer Feedback**

### **General Contractor D**

Our needs have been met with a highquality response. We would like to continue to do business with Issunbou.

# **Construction Consultancy E**

A high specification 3D design model was created with a rapid turnaround. The technical expertise was beyond our capabilities, and we wish to receive instruction on how this was executed.

### 5. Management and corporate data
